

# Wildlife Rehabilitation

## Skills Workshop – Raccoon Care

### Course ID kr003

This class is for wildlife rehabilitators wishing to learn species specific care techniques and principles for working with orphaned, ill, and injured raccoons. The course builds on basic wildlife rehabilitation skills, focusing on the following topics:

1. Intake examination
  - a. Basic physical exam
  - b. Exo- and endoparasites
  - c. Hydration
  - d. Charting
2. Housing, sanitation, and quarantine
3. Feeding and nutrition
  - a. Infants
  - b. Toddlers
  - c. Pre-release
4. Hands-on practice – feeding
5. Common problems and solutions
6. Release criteria

***Please note prerequisite:*** Students wishing to take the raccoon skills workshop must have completed the Well Baby Care or IWRC Basic 1AB classes, and must bring a copy of their TPWD-issued rehabilitation permit (or subpermit). If subpermitted, the permit holder must approve participation in this class (permit requirement does not apply to ACOs).

The class format is a combination of lecture, discussion, case study, and hands-on lab. The fee of \$30 covers classroom instruction, the class manual, and all lab materials and handouts. Payment is due before the start of the first class session. Payment may be made by mailing a check to

Texas Metro Wildlife Rehabilitators  
701 Timberline Court  
Arlington, TX 76006

or pay online at <http://www.txmetrowildlife.org/?c=classes>. **Upon receipt of payment, the manual will be emailed to you. Please download or print the manual for class.** If you have any questions, please do not hesitate to contact Kate at 817-229-5653 or [bwmidcities@tx.rr.com](mailto:bwmidcities@tx.rr.com).

TX DSHS has approved this class for 4 CE hours for Animal Control Officers.
