

Wildlife Introduction: Squirrels

Introducing Native Texas Wildlife and Best Practices

Course ID kw009

Course Overview

This class is to educate wildlife rehabilitators, Animal Control Officers and others who want to learn basic skills and to provide care for orphaned, ill, or injured squirrels.

1. Organization Overview
2. Difference between Rehab and Rescue
3. Type of squirrels (Tree, Flying, Ground)
4. Fox Squirrel Facts
5. Development Stages and Housing
6. Kennels: type and sizes
7. Medical, Supplies, and Feeding
8. Personal Protective Gear
9. Enrichment
10. Intake
11. Record Keeping
12. Sources for supplies and reference
13. Lab: feeding and handling

The class format is a combination of lecture, discussion, case study, and hands-on lab. The fee covers 4 hours of classroom instruction, the class manual, and hands-on lab. Payment is due before the start of the first class session.

Upon receipt of payment, a detailed confirmation and the manual will be emailed to you. Print the manual and bring to class.

To register, pay online at <https://batworld.org/general-wildlife-rehabilitation-training/> (scroll to the bottom of the page). **Upon receipt of payment, the manual will be emailed to you. Please download or print the manual for class.**
