

DID YOU KNOW THAT MINERAL WELLS IS HOME TO ONE OF THE WORLDS MOST IMPORTANT MAMMALS?

Much like the famous bats of Austin, we are lucky enough to house many colonies of Mexican free-tail bats around our town. While visiting the downtown area in the evening, you will likely see them zooming about the street lights, catching mosquitoes.

Bats are gentle, intelligent, and as major pollinators and pest control, they are absolutely vital to the ecosystem. Myths about bats have run wild- and most likely, much of what you've been told about them is false. There is no reason to fear them, as our bats mean you no harm! If you find a bat on the ground or hanging on a building, please call us immediately so that we can check on them.

In Mineral Wells, we are crazy about our bats. Please help us keep them safe! Check out the #BatCrazy hashtag to see our local rescues.
